BRITISH PHARMACOPOEIA CHEMICAL REFERENCE SUBSTANCE INFORMATION LEAFLET

PERINDOPRIL IMPURITY STANDARD CATALOGUE NUMBER 1074 CURRENT BATCH: 3444

Declared Content

No declared content figure is given as the standard is not used for assay purposes.

Use

This British Pharmacopoeia Chemical Reference Substance (BPCRS) is to be used as directed in the monograph(s) of the British Pharmacopoeia and is not intended for any other purpose.

Reference Chromatogram(s)

Related Substances

Column: Hichrom Inertsil C8, 5 µm (150 mm x 4.0 mm)

Mobile Phase A: Water adjusted to pH 2.5 with a mixture of equal volumes of perchloric acid and water

Mobile Phase B: 0.03% v/v solution of perchloric acid in acetonitrile

Gradient Programme: As per monograph method

Detection Wavelength: 215 nm

Flow rate: 1.0 mL/min

Column temperature: 60 °C

Autosampler Temperature: 4 °C

Injection Volume: 20 µL

Additional Information

When a British Pharmacopoeia Chemical Reference Substance (BPCRS) is directed to be used in an Assay or quantitative determination described in a monograph of the British Pharmacopoeia or the British Pharmacopoeia (Veterinary) the following statements apply.

Where a “declared content” is required the content stated on this leaflet is of the current batch of the BPCRS and is quoted on an ‘as is’ basis. This figure is to be used in calculating the results of the assay.

It is the responsibility of the analyst using any BPCRS for quantitative purposes to assure himself or herself that the batch number on the label corresponds with the batch number given on this leaflet.

For additional information on BPCRS please visit the British Pharmacopoeia website.
