TO WHOM IT MAY CONCERN

NORFLOXACIN TABLETS BP 2023

It has come to our attention that the flow rate specified in the Related substances test within the Norfloxacin Tablets monograph incorrectly states 1.0 mL/min. The monograph has therefore been revised to reflect the correct flow rate of 1.4 mL/min.

Please accept this as a notice of intent to amend the monograph on behalf of the British Pharmacopoeia Commission. This letter is for information only and does not represent a legally-enforceable standard. The revised monograph will be published in a future edition of the British Pharmacopoeia - the current target publication is the BP 2024, which will come into force on 1st January 2024.

If you have any questions concerning this letter, please do not hesitate to contact the British Pharmacopoeia Secretariat (BPCOM@mhra.gov.uk).

Yours faithfully,

MR JAMES POUND

Secretary & Scientific Director
