PAROXETINE TABLETS BP 2018

RELATED SUBSTANCES

It has come to our attention that the published LC method in the Related substances test for Paroxetine Tablets in the BP 2018 may not be suitable to resolve impurity A from the principal Paroxetine peak.

The monograph method will be revised with a suitable alternative at the earliest opportunity. Please accept this as a letter of intent on behalf of the British Pharmacopoeia Commission.

If you have any questions concerning this letter, please do not hesitate to contact the British Pharmacopoeia Secretariat at the address above.

Yours faithfully,

MR JAMES POUND

Acting Secretary & Scientific Director
