TO WHOM IT MAY CONCERN

PROCYCLIDINE HYDROCHLORIDE BP 2017

RELATED SUBSTANCES TEST

The flow rate of the carrier gas used in the test for Related substances using capillary gas chromatography in the monograph for Procyclidine Hydrochloride in the BP 2017 will be revised.

The flow rate of the carrier gas will be amended from 40 mL/minute to 0.8 mL/minute.

Please accept this as a letter of intent on behalf of the British Pharmacopoeia Commission. In the meantime a flow rate of 0.8 mL/min. may be used when carrying out the test from 1st September 2016 to 31st December 2017, that is, until the revised monograph is published.

If you have any questions concerning this letter, please do not hesitate to contact the British Pharmacopoeia Secretariat at the address above.

Yours faithfully,

DR SAMANTHA ATKINSON

Secretary & Scientific Director
